Important Notes:

Without exception, all current safety regulations must be observed in those countries where our products are used.

The photos shown in this brochure feature construction sites in progress. For this reason especially safety and anchor details cannot always be considered as conclusive or final. These are subject to the risk assessment carried out by the contractor.

The systems or items shown are not necessarily available in all countries.

Safety instructions and load specifications are to be strictly observed at all times. Separate structural calculations are required for any deviations from the standard design data.

The information contained herein is subject to technical changes in the interests of progress. Errors and typographical mistakes reserved.

SB Brace Frame

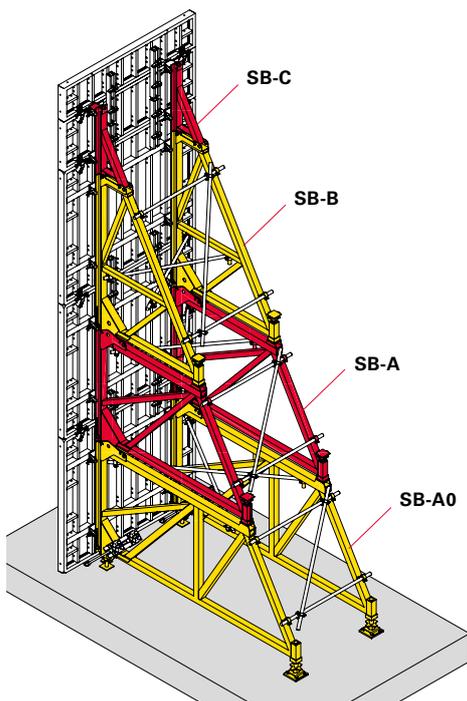

For single-sided walls up to 8.75 m high

PERI Brace Frame SB for single-sided walls up to 8.75 m high

During single-sided concreting, the concrete pressure is transferred into the sub-structure by means of the SB Brace Frame.

The PERI brace frame modular system has been designed for concreting heights up to 8.75 m and a fresh concrete pressure up to a maximum of 60 kN/m².

The SB brace frames can be combined with all PERI wall formwork systems. All units can be quickly connected without any additional components. The required connecting parts are already mounted to each brace frame. All individual components are sized to conform with truck or container dimensions.

SB-B and SB-C brace frame units with PERI TRIO panel formwork, concreting height 3.50 m.

Concreting heights up to 8.75m using SB-A0, A, B and C brace frames.

The PERI SB brace frames are connected with the MAXIMO, TRIO, DOMINO, VARIO GT 24 and RUNDFLEX wall formwork systems by means of system connection components.

The RUNDFLEX - SB connection is carried out using waler connector and wedge. The same components as for VARIO GT 24.

The brace frames are assembled on the panels lying on the ground. The friction-locked nature of the connection allows them to be lifted as a single unit.

The SB-A0, A, B and C brace frames are designed with a strong IPB profile on the front which allows forces to be transferred through them at any point. This means that the choice of formwork elements for MAXIMO, TRIO and DOMINO or the position of the steel waler with the GT 24 and RUNDFLEX is not important.

Concreting heights up to 6.75 m with B-A, B, C and VARIO GT 24. Complete with working platform and access ladder.

Forces are safely transferred at all connection points of the SB-A0, A, B and C.

SB Brace Frame

General, occurring forces

General

With single-sided concreting against existing walls, rock faces, sheet piling etc., the complete fresh concrete pressure on the formwork area must be transferred into the sub-structure through a brace frame construction complete with corresponding anchorage.

Area of application

The PERI Brace Frame SB is used for single-sided forming (as described above). For this standard application, load tables are available featuring the loads that have to be taken into consideration (see Tables).

Brace Frame SB-B, C
with TRIO, concreting
height 3.90 m.

8.75 m concreting height
with Brace Frame SB-A0,
A, B, C and TRIO.

Ocurring forces

Compressive forces V1 and V2

The transfer of all V1 and V2 compressive forces is normally ensured without any difficulty when the brace frame is used on a concreted bottom slab or foundations.

Tension force Z

For tension anchorage of the forces in the sub-structure, PERI offers different anchor systems.

The decisive factor regarding the choice of anchoring system are the tensile forces which occur.

Attention

If brace frames are positioned on slabs (e.g. underground car parks), V1 and V2 compressive forces must be transferred into the bottom slab or foundations using the appropriate support. On-site checks must be carried out to ensure that V1 and V2 compressive forces are safely transferred into the sub-structure.

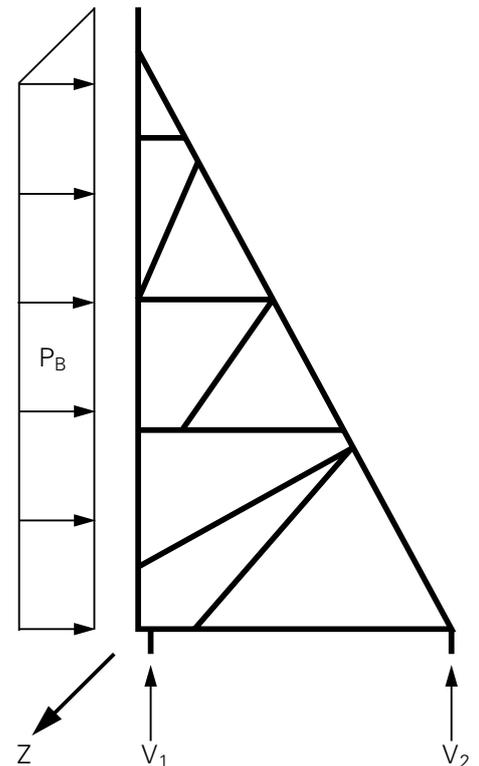

Table of permissible anchor forces

Anchor system	perm. load
DW 15	90 kN
DW 20	150 kN
DW 26	250 kN

Anchoring is always carried out using 2 anchors per brace frame so that, for example, if using the DW 20 system, a maximum tensile force of $2 \times 150 = 300$ kN is allowed.

When using PERI brace frames, the following points in particular are to be taken into consideration:

1. The structural components (e.g. foundations or bottom slab) must be able to accommodate all tensile and compressive forces which arise. Before concreting takes place, the dimensioning of the components is to be checked and provisions made for the positioning of the anchors.
2. Naturally, the "other side" of the single-sided formwork (existing wall, shoring, rock face etc.) must be able to withstand the fresh concrete pressure acting on them.
3. DW tie rods which have been installed for anchoring purposes must not be welded or bent.
4. If other anchor or formwork systems are used, the application possibilities and stability are subject to separate verification.
5. Any deviations from the information contained in this brochure always require separate static proof.

SB Brace Frame

Anchoring details

Brace Frame SB-A0, A, B with Anchor Waler.

Installation of the anchoring system according to pages 8 and 9.

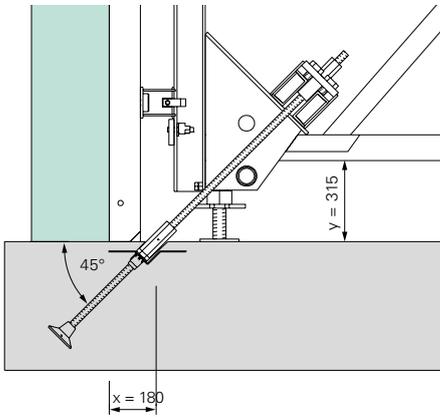

The given dimensions x and y are ideal values. Dimension x lies in an undisturbed area behind the formwork. Conversely, if dimension x is changed, dimension y must be altered by the same value.

If x is larger, y must be smaller – if x is smaller, y must be larger.

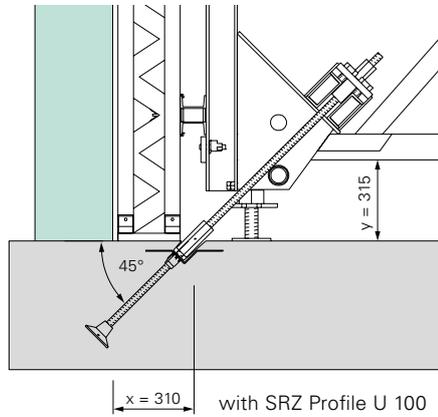

Note

If dimension x is made smaller, anchoring takes place in the area of the formwork.

SB Brace Frame

Simple and accurate anchor installation

Anchor installation

With the PERI V-shaped tie holder and leading anchor coupler, accurate assembly of the tension anchor at an angle less than 45° is possible. This guarantees a safe transfer of loads resulting in increased stability for brace frame and formwork.

The economical advantages of the PERI tension anchorage with V-shaped tie holder and leading coupler are:

- less on-site coupling nut requirements
- no cutting of tie rods required
- reusable tie rods

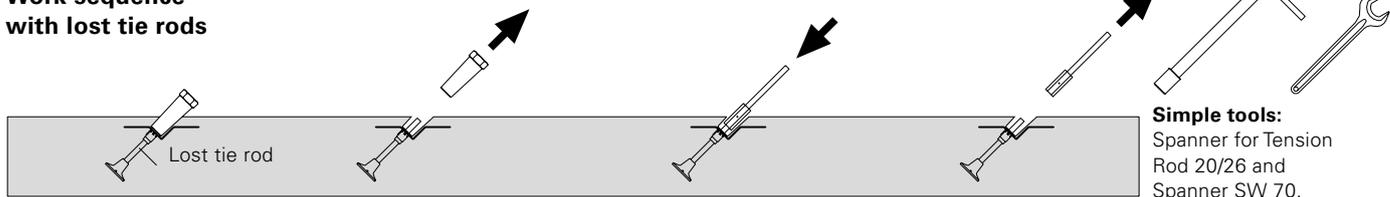

Easy and simple fixing of the anchoring to the reinforcement ...

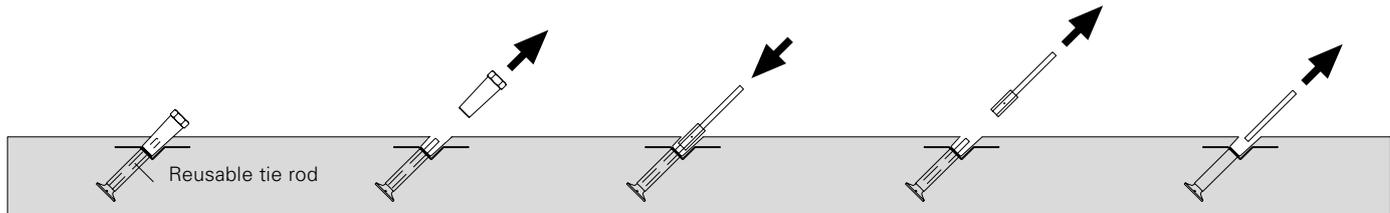

... and easy dismantling of the leading anchor coupler.

Work sequence with lost tie rods

1. Installation of tie with V-shaped tie holder and leading coupler.
2. Dismantling of the leading anchor coupler with the SW 70 spanner.
3. Tightening of the coupling nut and tension rod.
4. After concreting, remove tension rod and coupling nut, then fill remaining hole.

Work sequence with reusable tie rods

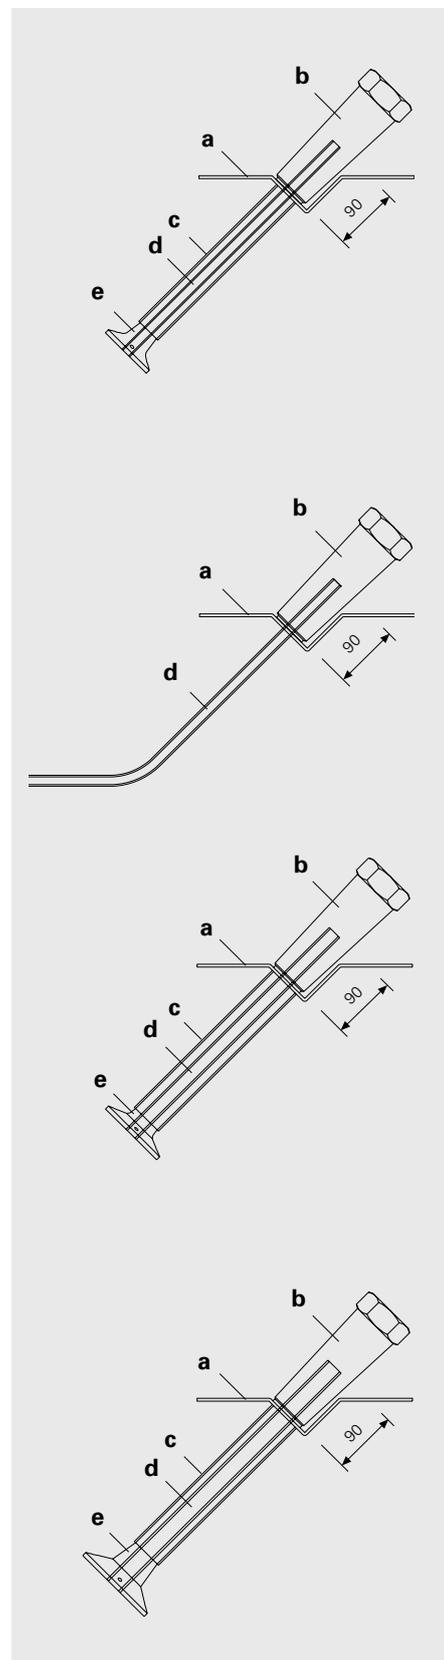

1. Installation of tie with V-shaped tie holder and leading coupler.
2. Dismantling of the leading anchor coupler with the SW 70 spanner.
3. Tightening of the coupling nut and tension rod.
4. After concreting, remove tension rod and coupling nut.
5. Tie rod is screwed out using Spanner for Tension Rod 20/26. Fill remaining hole.

Safety instructions

The support (connection) of the panel must always take place at the point where the tie is installed during normal operations (double-faced). Otherwise the static system of the formwork panel is altered which can

lead to large deformations and, in extreme cases, breakage.

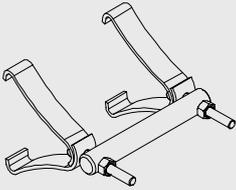

If extending the formwork, the specifications provided by PERI for each respective system must be taken into consideration.

SB Brace Frame

Pre-assembly, diagonal bracing, crane transport

Pre-assembly

Assembly of the Brace Frame SB with the formwork element takes place in an appropriate manner on the horizontally-positioned panel. For the required connection components, please take into consideration pages 12 to 15 as well as the component overview. A crane is always required for assembly purposes.

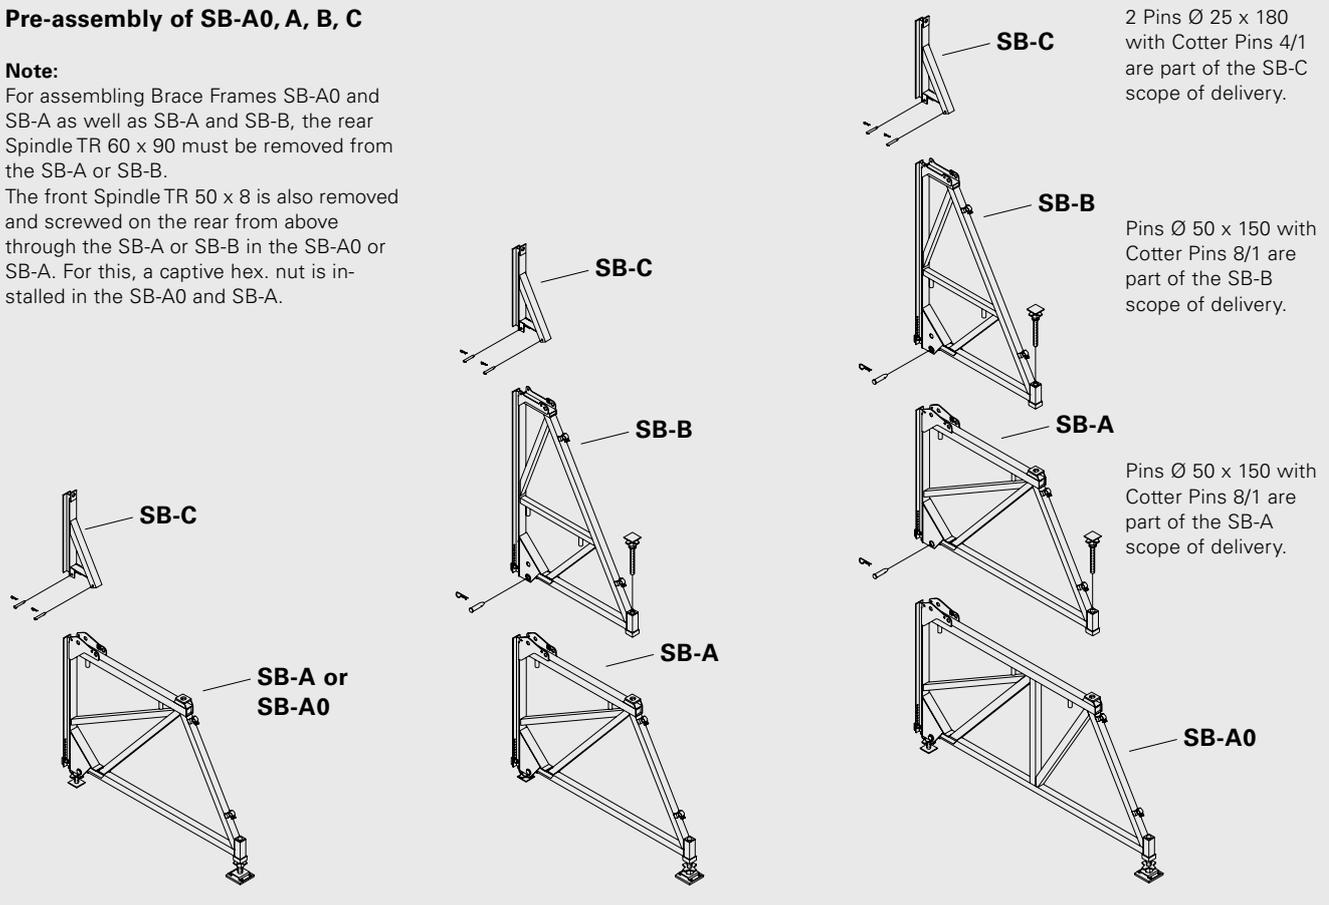

Assembly of Brace Frames SB-A, B and c on horizontal TRIO elements.

Pre-assembly of SB-A0, A, B, C

Note:

For assembling Brace Frames SB-A0 and SB-A as well as SB-A and SB-B, the rear Spindle TR 60 x 90 must be removed from the SB-A or SB-B.

The front Spindle TR 50 x 8 is also removed and screwed on the rear from above through the SB-A or SB-B in the SB-A0 or SB-A. For this, a captive hex. nut is installed in the SB-A0 and SB-A.

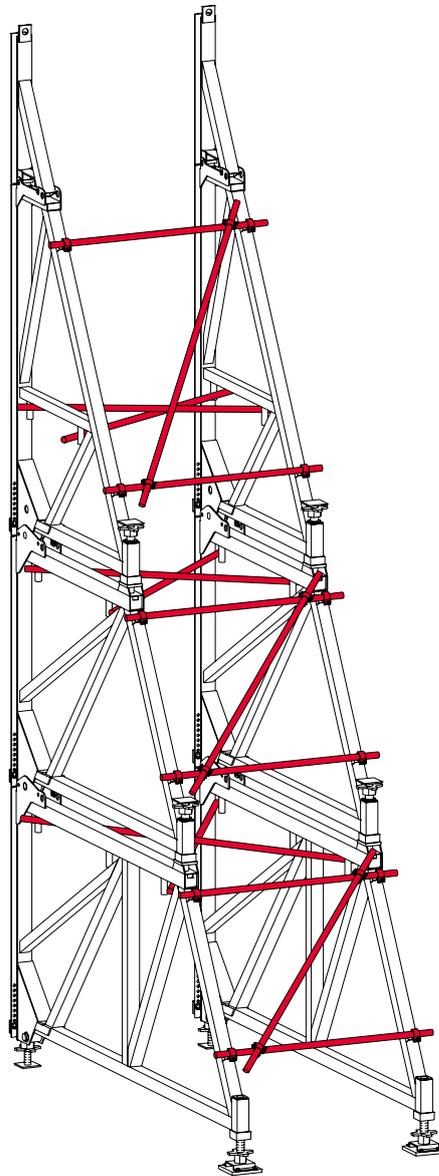

Diagonal bracing

For the required diagonal bracing, Scaffold Tubes $\varnothing 48.3 \times 3.2$ as well as Swivel Couplers 48/48 mm are used.

Possible diagonal bracing on Brace Frames SB-A0, A, B, C

For the SB-A0, A, B and C, the required diagonal bracing is specified in the design tables.

Crane transport

Safety instructions

For transporting movable units by crane, always use the designated suspension points on the brace frame and never exceed the maximum load-bearing capacity (see Components). The crane must never be used to release the panel from the concrete!

Table for easy weight determination of Brace Frames SB-A0, A, B, C and SB-1 and 2 movable units.

*Units consist of 2 brace frames including diagonal bracing without anchorage. The formwork can be assumed in simplified terms with 60 kg/m^2 . This weight must be included in the respective unit.

Unit	Weight/Unit*
SB-A0	850 kg
SB-A	650 kg
SB-B	550 kg
SB-A, C	750 kg
SB-A, B	1200 kg
SB-B, C	650 kg
SB-A, B, C	1300 kg
SB-A0, A, B, C	2100 kg
SB-1	310 kg
SB-2	780 kg

SB Brace Frame

Use as horizontal heavy-duty bracket

The PERI SB Brace Frame can also be used as a heavy-duty bracket. This application allows the erection of large working platforms (< 8.75 m) whilst simultaneously accommodating high shear forces.

The spacing and number of brace frame sections are determined through the existing load.

The large shear and tensile forces are transferred into the concrete by means of the building authority-approved PERI Climbing Cone-2 M36/DW 26.

The anchoring systems for horizontal applications have official building authority approval.

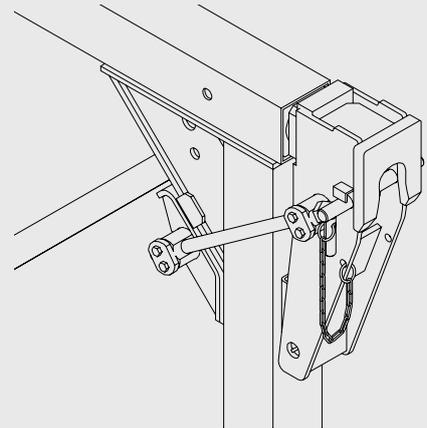

Two variants are available:

1. Double-suspension with Brace Frame Mounting Shoe SB Double

For the SB-A0, A and B systems. The permissible shear force for the Brace Frame Mounting Shoe-2 is 200 kN.

2. Single-suspension with Brace Frame Mounting Shoe SB

For SB-2, SB-A0, A and B brace frames. The permissible shear force for the Brace Frame Mounting Shoe is 120 kN.

Installation with SB-2
With Brace Frame Mounting Shoe and Brace Frame Adapter SB-2.

Installation with SB-A0, A and B
With Brace Frame Mounting Shoe-2.

Using SB-A and B brace frame systems as working platform and heavy-duty brackets.

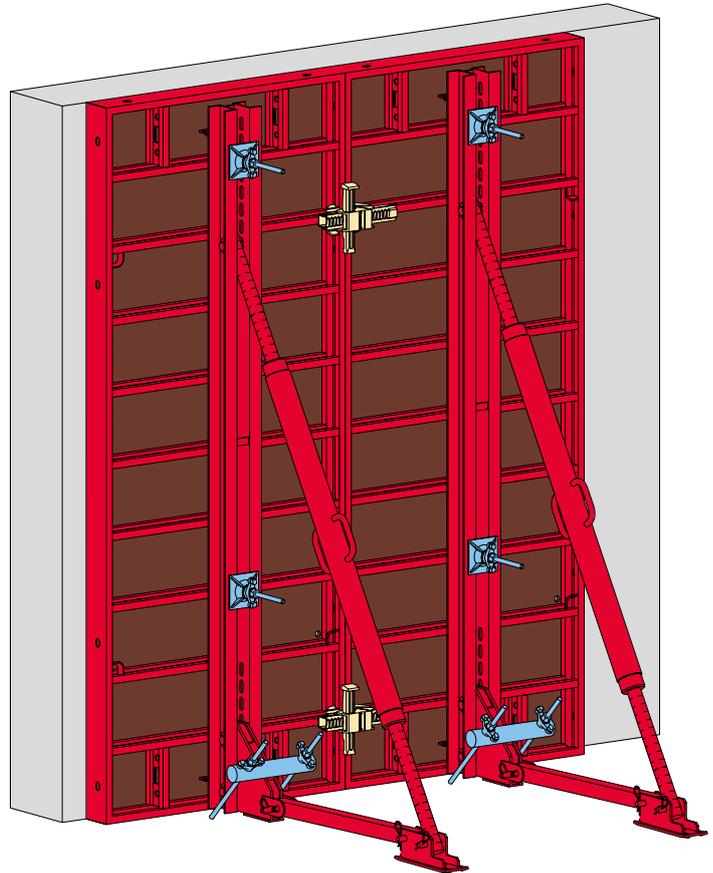

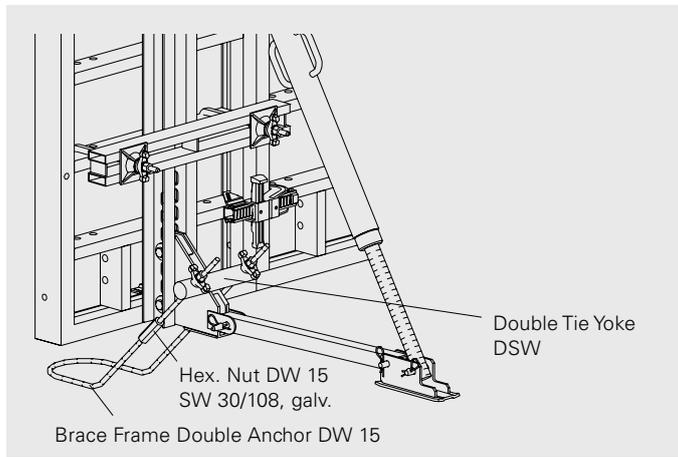

Brace Frame SB-L (Light), SKS

Additional single-sided wall formwork

Brace Frame SB-L (Light)

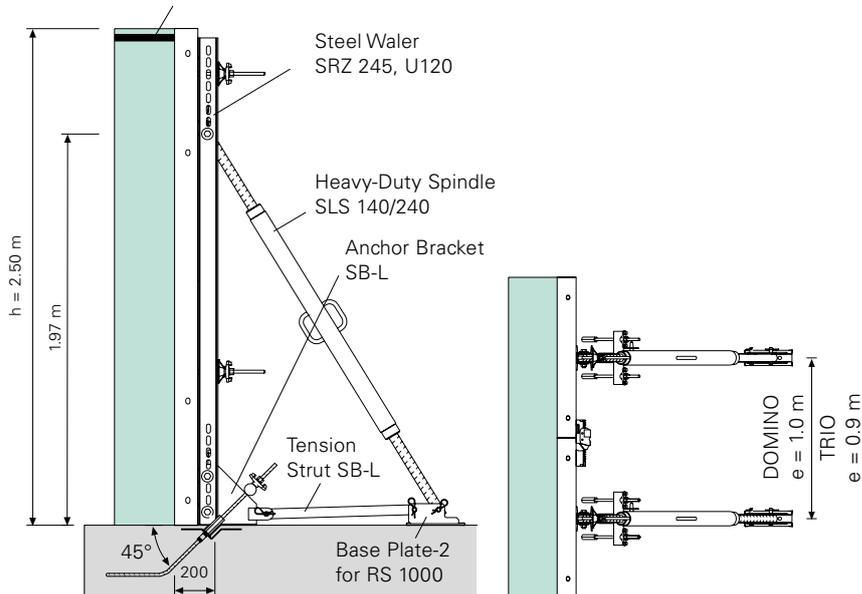

The Brace Frame SB-L has been designed especially for manual forming operations during renovation work or if no crane is available. Assembled from standard components, it allows the construction of single-sided walls with up to 2.70 m concreting heights.

114107	1,190	Sleeve SB-MAXIMO, galv.
114417	1,400	Sleeve SB-MAXIMO WDMX

SB Brace Frame

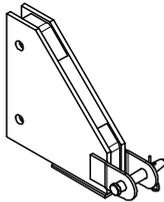

Item no.	Weight kg
100901	5,370

SB-L Tension Strut, l = 740 mm
For Brace Frame SB-L. For forming single-sided walls.

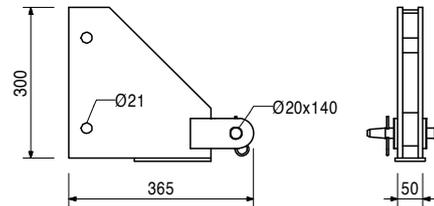

100903	12,000
--------	--------

SB-L Anchor Bracket
For Brace Frame SB-L. For forming single-sided walls.

Complete with

- 1 pc. 105400 Pin Ø 20 x 140, galv.
- 1 pc. 018060 Cotter Pin 4/1, galv.

Accessories

024910	0,303
710334	0,064
024180	0,126

Bolt ISO 4014 M20 x 100-8.8, galv.
Nut ISO 4032 M20-8, galv.
Compensation Washer 20, galv.

010050	51,600
--------	--------

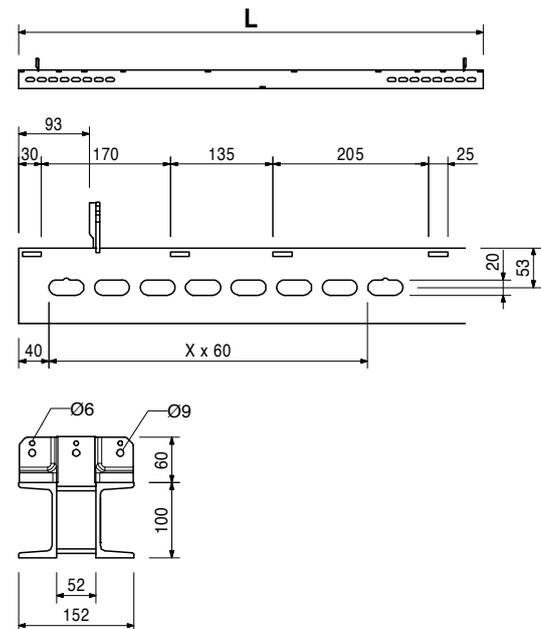

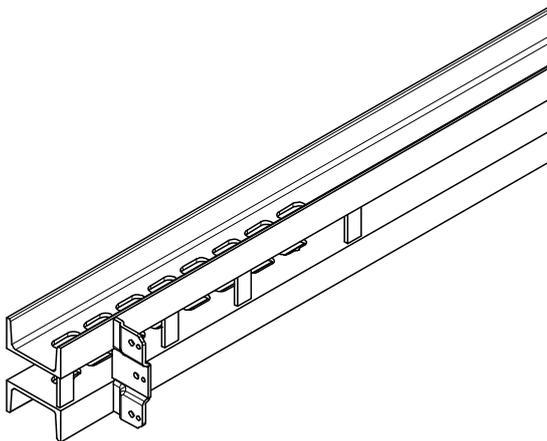

Steel Waler SRZ U-100 l = 2,45 m
Steel waler for VARIO GT 24 panels and special applications.

Note

Special lengths and other profile sizes on request.

Technical Data

Wy = 82.4 cm³, Iy = 412 cm⁴

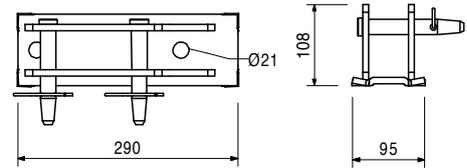

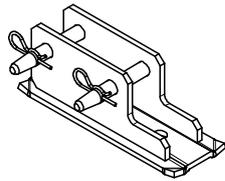

SB Brace Frame

Item no.	Weight kg
102018	4,880

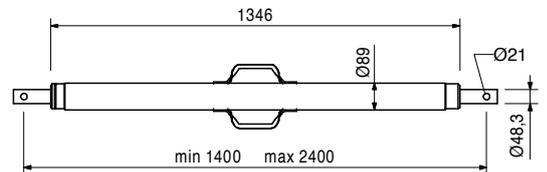

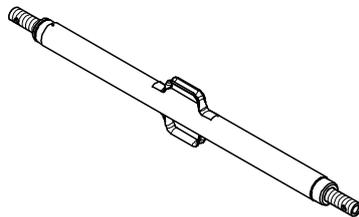

Base Plate-2 for RS 1000/1400, galv.
For assembly of RS 1000/1400 push-pull props.

Complete with
2 pc. 105400 Pin \varnothing 20 x 140, galv.
2 pc. 018060 Cotter Pin 4/1, galv.

101776	24,200
--------	--------

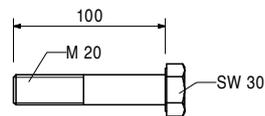

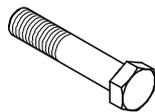

Heavy Duty Spindle SLS 140/240
As adjustable spindle in lattice frameworks with SRU Steel Walers and RCS Climbing Rails.

024910	0,303
--------	-------

Bolt ISO 4014 M20 x 100-8.8, galv.

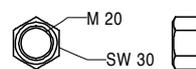

Note
Wrench size SW 30.

710334	0,064
--------	-------

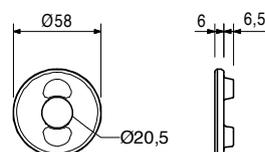

Nut ISO 4032 M20-8, galv.

Note
Wrench size SW 30.

024180	0,126
--------	-------

Compensation Washer 20, galv.

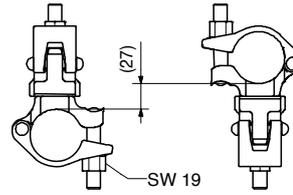

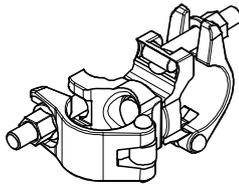

SB Brace Frame

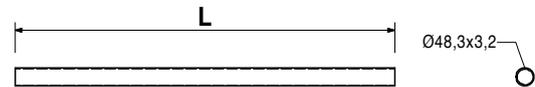

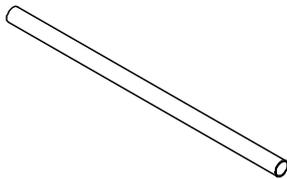

Item no.	Weight kg
017010	1,400

Swivel Coupling DK 48/48, galv.
For Scaffold Tubes Ø 48 mm.

Note
Wrench size SW 19.

		Scaffold Tubes Steel Ø 48.3 x 3.2	L
026415	3,550	Scaff. Tube Steel Ø 48.3 x 3.2, special length	
026417	0,000	Cutting Cost Scaffold Tube

026413	10,650	Scaff. Tube Steel Ø 48.3 x 3.2, l = 3.0 m	3000
026414	14,200	Scaff. Tube Steel Ø 48.3 x 3.2, l = 4.0 m	4000
026419	17,750	Scaff. Tube Steel Ø 48.3 x 3.2, l = 5.0 m	5000
026418	21,600	Scaff. Tube Steel Ø 48.3 x 3.2, l = 6.0 m	6000

		Spanners SW for SB	L
027210	3,300	Spanner SW 80, for SB	645
027213	2,300	Spanner SW 70, for SB	570
027211	0,760	Spanner SW 46, for SB	380

For different applications.

		Tie Rods DW 15	Note
030030	1,440	Tie Rod DW 15 Spec. Length	Non-weldable! Take official approval into consideration! Technical Data Permissible load 90 kN.
030050	0,000	Cutting Cost Tie Rod DW 15, B 15	
030005	0,720	Tie Rod DW 15 l = 0.50 m	
030480	1,440	Tie Rod DW 15 l = 1.00 m	

SB Brace Frame

Item no. Weight kg

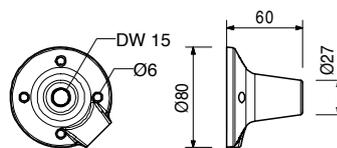

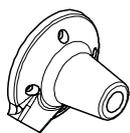

030840 0,516

Threaded Anchor Plate DW 15

For use with Tie Rod DW 15 or B 15. For anchoring in the concrete.

Note

Lost anchor part.

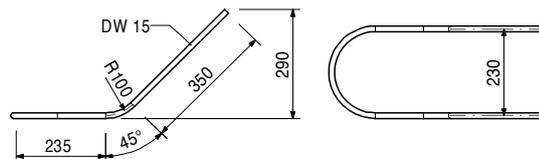

030060 2,130

Brace Frame Double Anchor DW 15

Non-weldable! Take approval into consideration!

Technical Data

Permissible load 2 x 90 kN. Dependent on concrete strength and installation depth.

030090 0,402

Hex. Nut DW 15 SW 30/108, galv.

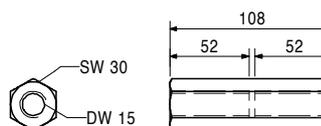

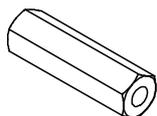

For coupling Tie Rod DW 15 and B 15.

Note

Wrench size SW 30.

Technical Data

Permissible load 90 kN.

030100 0,438

Wingnut DW 15, galv.

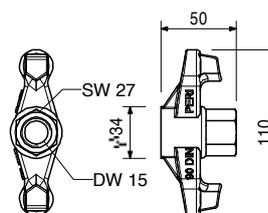

For anchoring with Tie Rod DW 15 and B 15.

Note

Wrench size SW 27.

Technical Data

Permissible load 90 kN.

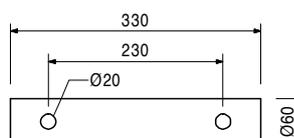

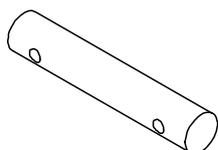

027520 7,030

Double Anchor Tie Yoke DSW

For anchoring with Tie Rod DW 15.

Technical Data

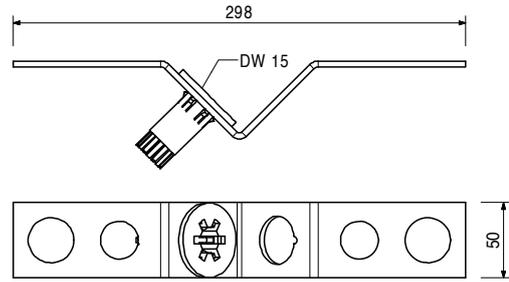

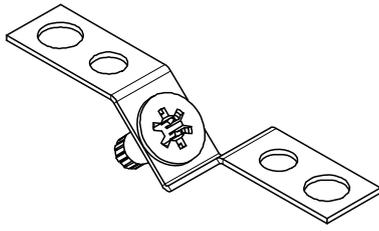

Permissible load 2 x 90 kN.

Item no.	Weight kg
031580	0,440

V-Tie Holder DW 15

For easy installation of DW 15 Tie Rods at 45° inclinations.

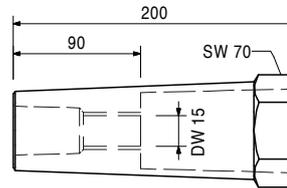

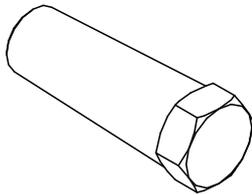

031631	0,345
--------	-------

Leading Anchor Coupler DW 15, compl.

For easy installation of DW 15 Tie Rods at 45° inclinations.

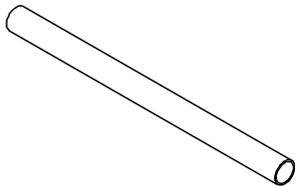

Note
Wrench size SW 70.

031627	0,967
--------	-------

Spacer Tube rough DR 32 l = 3.00 m

Plastic spacer tube for DW 26.

030700	2,560
030800	0,000
030640	1,280
030641	2,560

Tie Rods DW 20

Tie Rod DW 20 Spec. Length

Cutting Cost Tie Rod DW 20/B 20

Tie Rod DW 20 l = 0.50 m

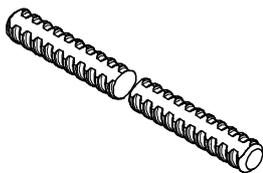

Tie Rod DW 20 l = 1.00 m

Note

Non-weldable! Take official approval into consideration!

Technical Data

Permissible load 150 kN.

Item no. Weight kg

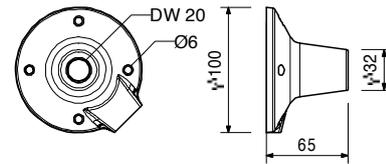

030860 0,801

Threaded Anchor Plate DW 20

For use with Tie Rod DW 20, B 20 or Screw-On Cone-2 M24/DW 20. For anchoring in concrete.

Note

Lost anchor part.

030590 0,685

Hex. Nut DW 20 SW 36/110

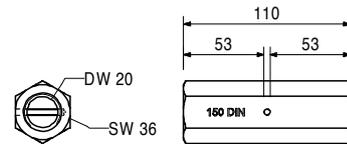

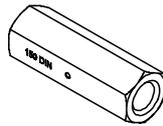

For coupling Tie Rod DW 20 and B 20.

Note

Wrench size SW 36.

Technical Data

Permissible load 150 kN.

030580 0,371

Hex. Nut DW 20 SW 36/60

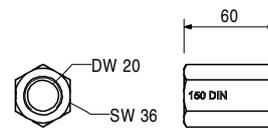

For anchoring with Tie Rod DW 20 and B 20.

Note

Wrench size SW 36.

Technical Data

Permissible load 150 kN.

030990 0,786

Wingnut DW 20, galv.

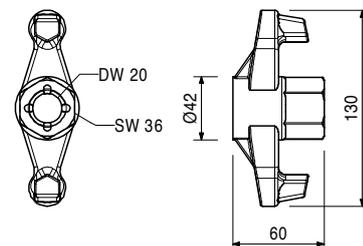

For anchoring with Tie Rod DW 20 and B 20.

Note

Wrench size SW 36.

Technical Data

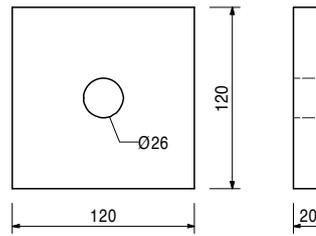

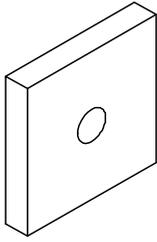

Permissible load 150 kN.

Item no.	Weight kg
030830	2,180

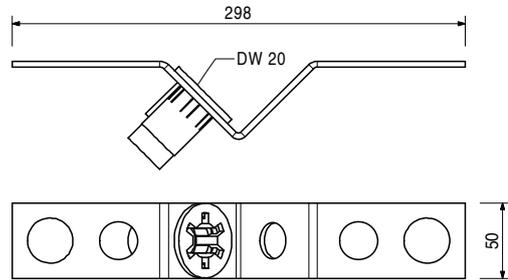

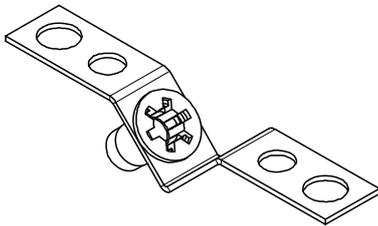

Counterplate DW 20, 120 x 120 x 20
For anchoring with Tie Rod DW 20 and B 20.

Technical Data
Permissible load 150 kN.

031590	0,420
--------	-------

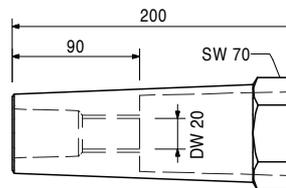

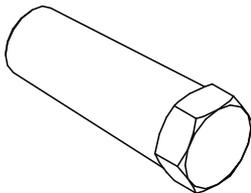

V-Tie Holder DW 20
For easy installation of DW 20 Tie Rods at 45° inclinations.

031632	0,355
--------	-------

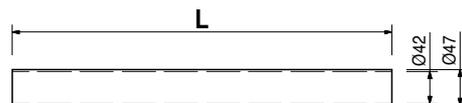

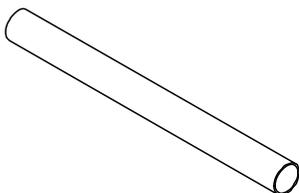

Leading Anchor Coupler DW 20, compl.
For easy installation of DW 20 Tie Rods at 45° inclinations.

Note
Wrench size SW 70.

031634	1,250
--------	-------

Spacer Tube rough DR 42 l = 3.00 m
Plastic spacer tube for DW 20, 26.

Item no. Weight kg

		Tie Rods DW 26
030340	4,480	Tie Rod DW 26 Spec. Length
030500	0,000	Cutting Cost Tie Rod DW 26
030645	2,240	Tie Rod DW 26 l = 0.50 m
030646	4,480	Tie Rod DW 26 l = 1.00 m

Note

Non-weldable! Take official approval into consideration!

Technical Data

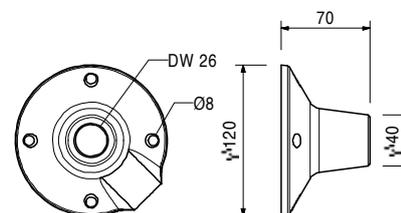

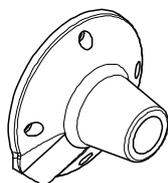

Permissible load 250 kN.

030870	1,240	Threaded Anchor Plate DW 26 For use with Tie Rod DW 26 or Screw-On Cone M36 / DW 26. For anchoring in the concrete.
--------	-------	---

Note

Lost anchor part.

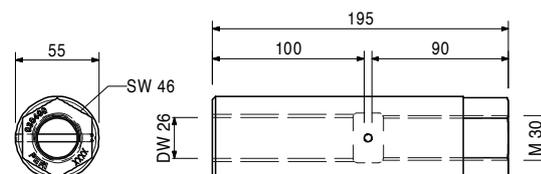

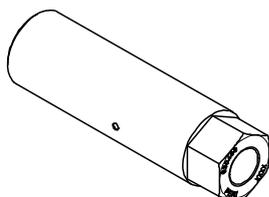

030400	2,620	Coupling Nut M 30/DW 26, galv. For coupling Tension Rod and Tie Rod DW 26.
--------	-------	--

Note

Wrench size SW 46.

Technical Data

Permissible load 250 kN.

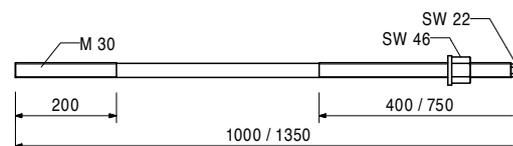

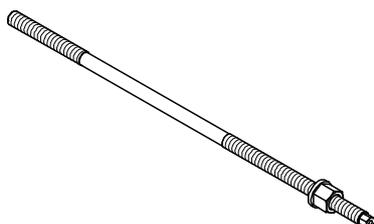

027540	5,170	Tension Rods M30 with Nut
027230	6,810	Tension Rod with Nut 100/M30 Tension Rod with Nut 135/M30 For anchoring the Brace Frame SB.

Note

Wrench size SW 46 and SW 22.

Technical Data

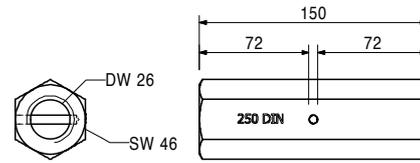

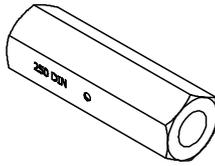

Permissible load 250 kN.

Item no.	Weight kg
030980	1,540

Hex. Coupler DW 26 SW 46/150, weldable
For coupling Tie Rod DW 26.

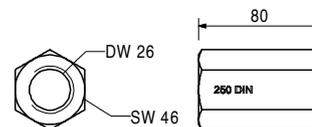

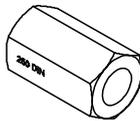

Note
Weldable! Wrench size SW 46.
Technical Data
Permissible load 250 kN.

030970	0,800
--------	-------

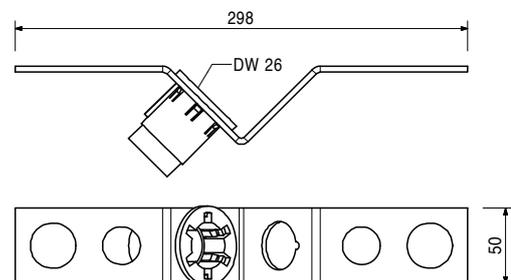

Hex. Coupler DW 26 SW 46/80, weldable
For anchoring with Tie Rod DW 26.

Note
Weldable! Wrench size SW 46.
Technical Data
Permissible load 250 kN.

031600	0,430
--------	-------

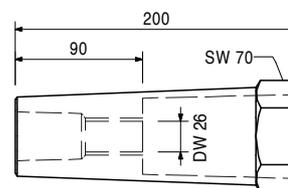

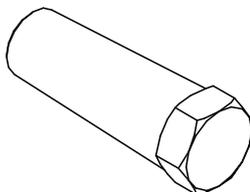

V-Tie Holder DW 26
For easy installation of DW 26 Tie Rods at 45° inclinations.

031633	0,365
--------	-------

Leading Anchor Coupler DW 26, compl.
For easy installation of DW 26 Tie Rods at 45° inclinations.

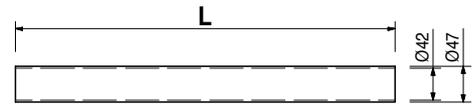

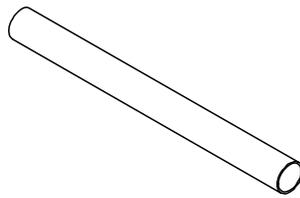

Note
Wrench size SW 70.

SB Brace Frame

Item no.	Weight kg
031634	1,250

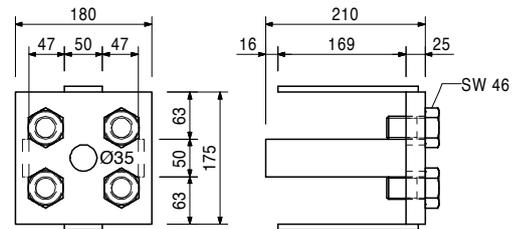

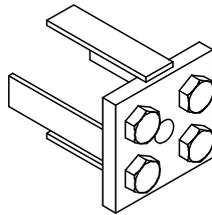

Spacer Tube rough DR 42 l = 3.00 m
Plastic spacer tube for DW 20, 26.

101621	10,100
--------	--------

Tension Release Plate SB DW 26
For anchoring the Brace Frame SB. Allows easy release of higher tensile loads. In connection with Anchor Waler 55 or 235. Turn bolt to working position before shuttering.

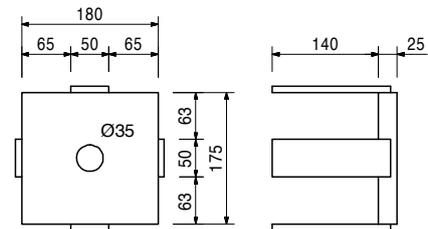

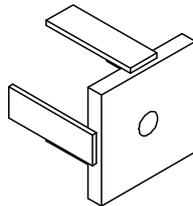

Note
Wrench size SW 46.
Technical Data
Permissible load 250 kN.

027480	7,960
--------	-------

Anchor Plate SB - DW 26
For anchoring of Brace Frame SB.

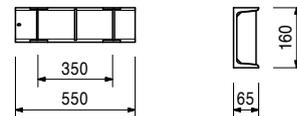

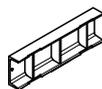

Technical Data
Permissible load 250 kN.

109017	11,600
--------	--------

Anchor Waler U160 l = 0.55 m
For anchoring of Brace Frame SB.

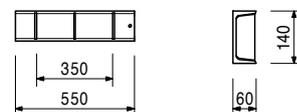

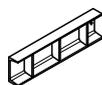

Technical Data
Permissible load 2 x 250 kN.

027650	9,940
--------	-------

Anchor Waler U140 l = 0.55 m
For anchoring of Brace Frame SB.

Technical Data
Permissible load 2 x 135 kN.

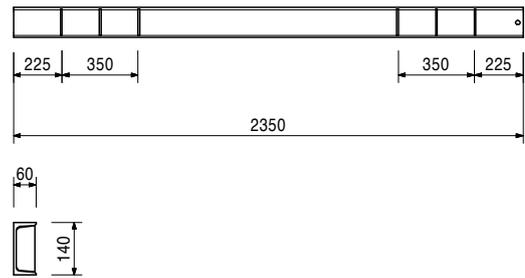

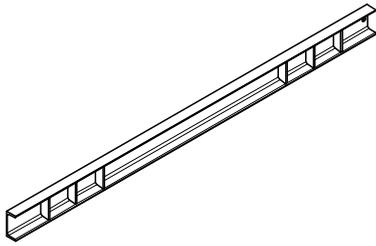

SB Brace Frame

Item no.	Weight kg
027530	39,800

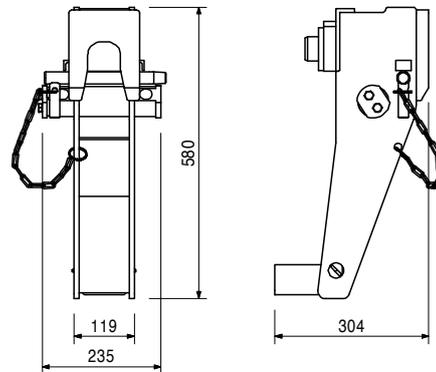

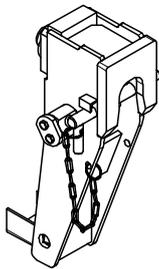

Anchor Waler U140 I = 2.35 m
For anchoring the Brace Frame SB.

Technical Data
Permissible load 2 x 135 kN.

106661	32,000
--------	--------

Brace Frame Wall Scaffold Hinge
For horizontal use of PERI Brace Frames SB-A0, A, B and SB-2 as climbing brackets.

Accessories

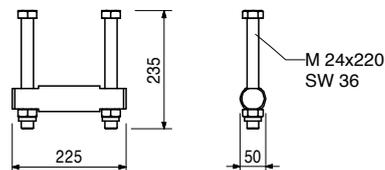

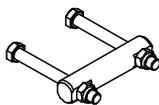

106662	4,870
106663	13,900

Brace Frame Adaptor SB A0, A, B
Brace Frame Adaptor SB-2

106662	4,870
--------	-------

Brace Frame Adaptor SB A0, A, B
For mounting the brace frame wall scaffold hinge to the Brace Frame SB-A0, A or B

Complete with
2 pc. 106803 Nuts ISO 7042 M24-10, galv.
2 pc. 106797 Bolt ISO 4014 M24 x 220-10.9, galv.
Note
Wrench size SW 36.

SB Brace Frame

Item no.	Weight kg
106663	13,900

Brace Frame Adaptor SB-2

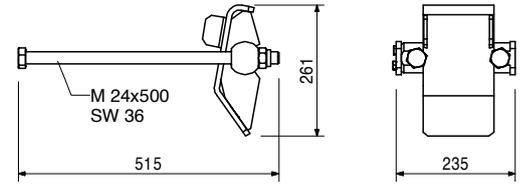

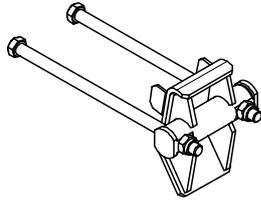

For mounting of Brace Frame Wall Scaffold Hinge to the Brace Frame SB-2.

Complete with

2 pc. 106798 Bolt ISO 4014 M24 x 500-10,9, galv.
2 pc. 106803 Nuts ISO 7042 M24-10, galv.

Note

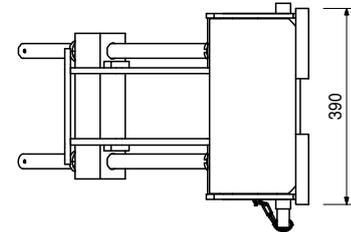

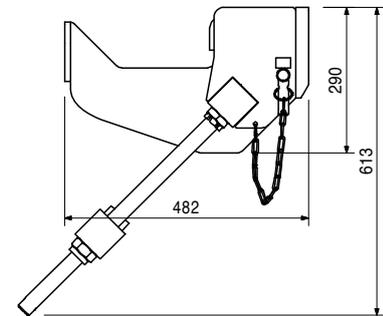

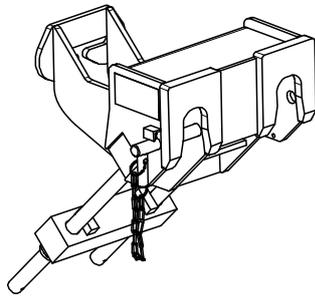

Wrench size SW 36.

111866	64,600
--------	--------

Wall Scaffold Hinge SB double

For horizontal use of PERI Brace Frames SB-A0, A, B as climbing brackets.

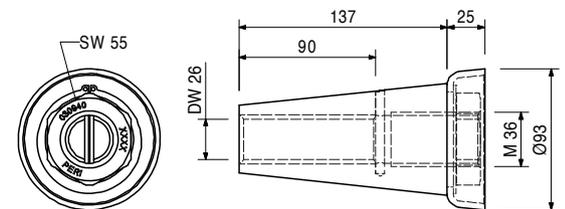

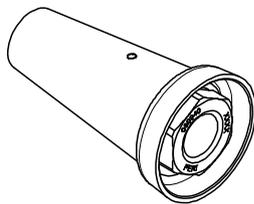

030940	3,040
--------	-------

Climbing Cone-2 M 36/DW 26, galv.

Tie System M36.
For anchoring of climbing systems.

Note

Wrench size SW 55.

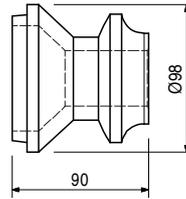

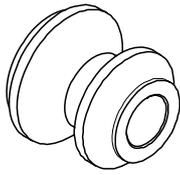

Accessories

030870	1,240
030340	4,480

Threaded Anchor Plate DW 26
Tie Rod DW 26 Spec. Length

Item no.	Weight kg
029490	1,770

Scaffold Mounting Ring M36, galv.
Tie System M36.
For anchoring of climbing systems.

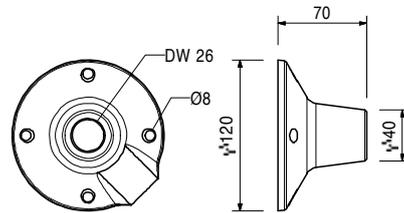

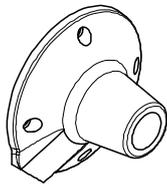

Item no.	Weight kg
029550	1,400

Accessories
Bolt ISO 4014 M36 x 130-10.9, galv.

Item no.	Weight kg
030870	1,240

Threaded Anchor Plate DW 26
For use with Tie Rod DW 26 or Screw-On Cone M36 / DW 26. For anchoring in the concrete.

Note
Lost anchor part.

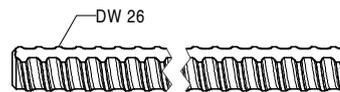

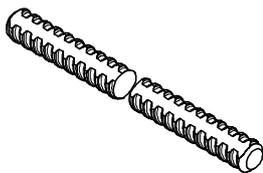

Item no.	Weight kg
030340	4,480
030500	0,000

Tie Rod DW 26
Tie Rod DW 26 Spec. Length
Cutting Cost Tie Rod DW 26

Note
Non-weldable! Take official approval into consideration!

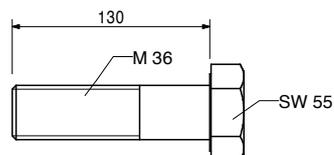

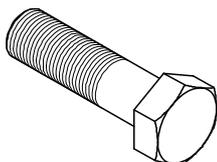

Technical Data
Permissible load 250 kN.

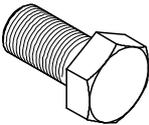

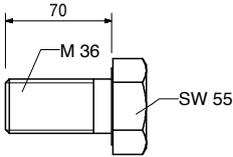

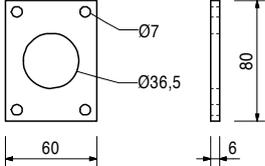

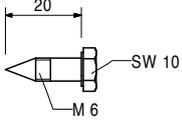

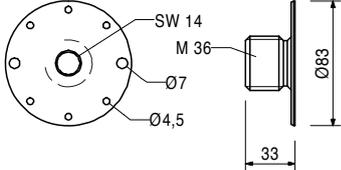

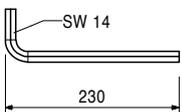

Item no.	Weight kg
029550	1,400

Bolt ISO 4014 M36 x 130-10.9, galv.
High-strength bolts for anchoring of climbing systems.

Note
Wrench size SW 55.
